

Application No.: 10/696,048  
Docket No.: PE0649 US DIV6

### Listing of Claims

1-11. (Canceled)

12. (Previously Presented) A compound having one of the following structures:

13. (Previously Presented) An electronic device comprising an organic layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 12.

14. (Previously Presented) An electronic device comprising a light emitting layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 12.

15. (Previously Presented) An electronic device comprising a charge transport layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 12.

Application No.: 10/696,048  
Docket No.: PE0649 US DIV6

16. (Previously Presented) An electronic device comprising an organic layer comprising at least one Ir(III) compound made from precursor compounds having the following structure.

17. (Previously Presented) The device of Claim 16, wherein the organic layer is a light-emitting layer.

18. (Previously Presented) The device of Claim 16, wherein the organic layer is a charge transport layer.

19. (New) A compound having one of the following structures:

20. (New) An electronic device comprising an organic layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 19.

Application No.: 10/696,048  
Docket No.: PE0649 US DIV6

21. (New) An electronic device comprising a light emitting layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 19.

22. (New) An electronic device comprising a charge transport layer comprising at least one Ir(III) compound made from precursor compounds having the structure set forth in Claim 19.
